

Chef Workstation Installation

Step-1: download the latest Chef Development Kit

```
#wget https://opscode-omnibus-  
packages.s3.amazonaws.com/ubuntu/12.04/x8  
6_64/chefdk_0.5.1-1_amd64.deb
```

Step-2: Install ChefDK

```
#sudo dpkg -i chefdk_*.deb
```

Step-3: Remove the install file:

```
#rm chefdk_*.deb
```

Step-4: Verify the components of the development kit:

#chef verify

Step-5: Generate the chef-repo and move into the newly-created directory:

#chef generate repo chef-repo

#cd chef-repo

Hosted Chef Configuration

The screenshot shows the 'Welcome to CHEF MANAGE' login screen. The page features a dark header with the CHEF MANAGE logo and a light-colored main content area. In the center, there is a message: 'Thank you for using Chef!', followed by 'You are not yet a member of any organizations, so please either create a new organization or accept a pending invitation.' Below this message, another note says, 'If you are trying to join a specific organization and don't have any invitations, get someone in that organization to send you an invitation, then hit the refresh button.' At the bottom of the page are three buttons: 'Sign Out' (orange), 'Create New Organization' (orange), and 'Accept Invitations (0 pending)' (light blue).

CHEF
MANAGE

Welcome to
CHEF
MANAGE

Thank you for using Chef!

You are not yet a member of any organizations, so please either create a new organization or accept a pending invitation.

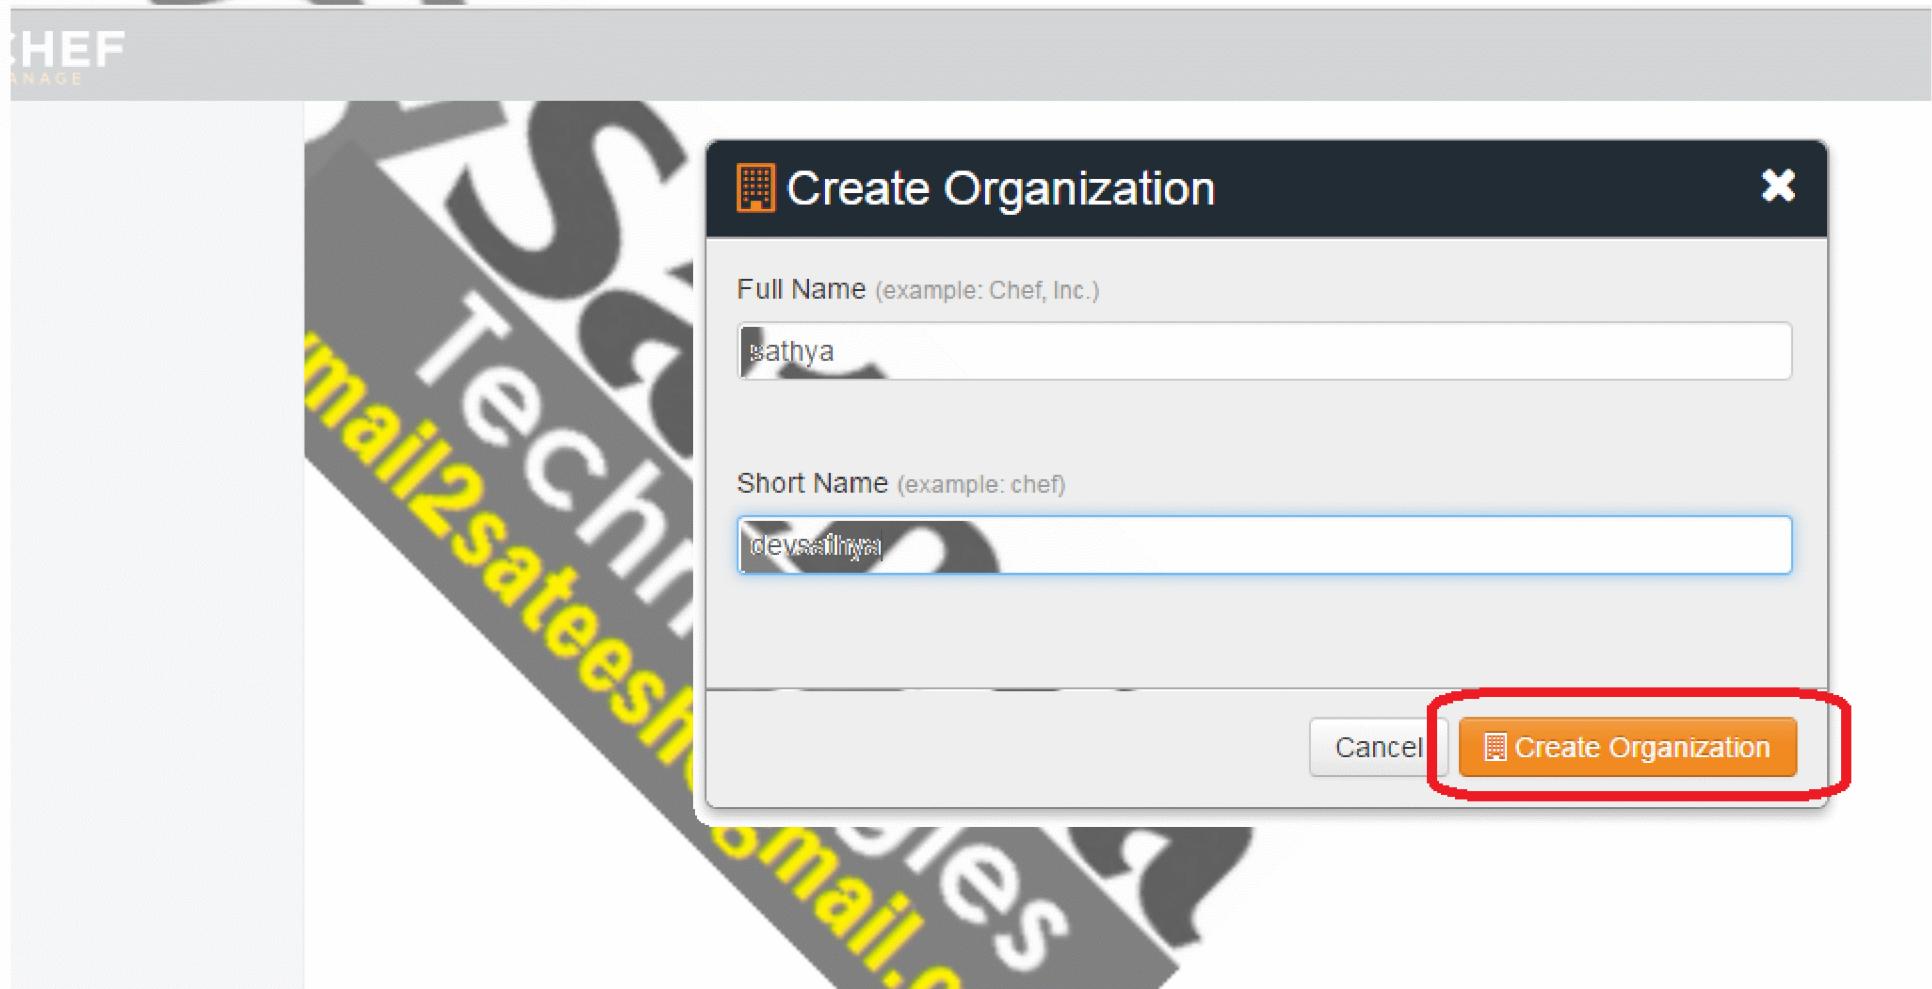

If you are trying to join a specific organization and don't have any invitations, get someone in that organization to send you an invitation, then hit the refresh button.

sreedhar@chef.com

```
chefdk# cd chef-repo  
chefdk# knife --version  
chefdk# knife node list  
chefdk# knife help list
```

To Config Chef Client :

Syntax:

```
knife bootstrap <node ip> --sudo -x <user> -P  
<passwd> -N "node name"
```

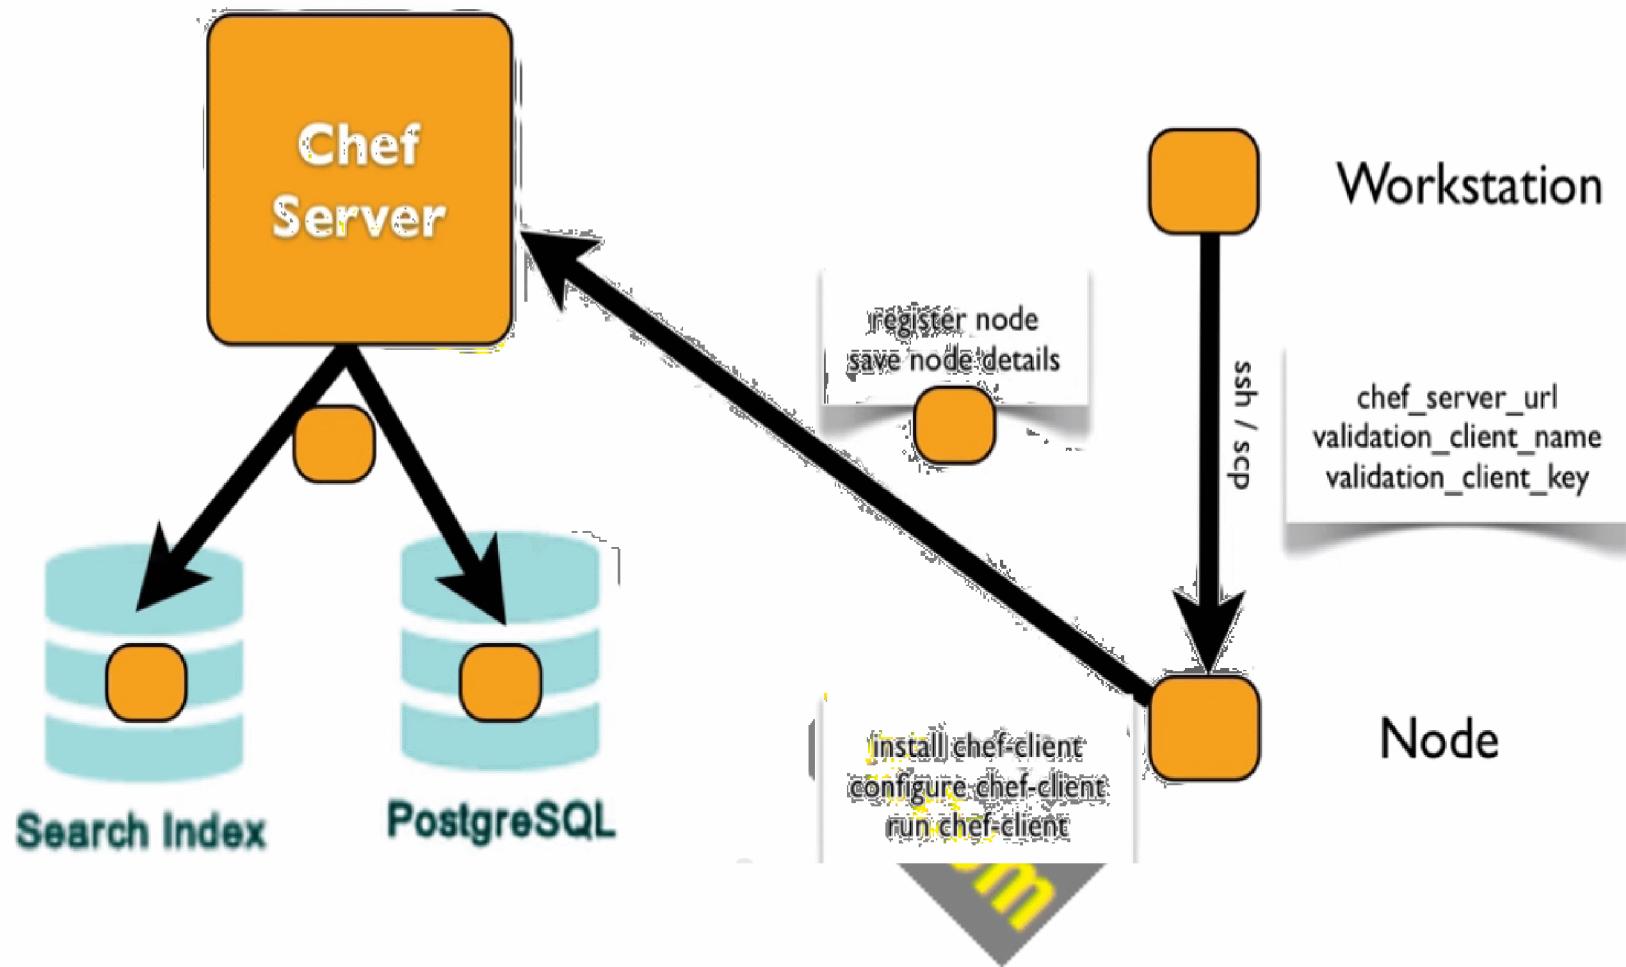

Ex:

```
chefdk# knife bootstrap 192.168.36.12 -x root -P  
root -N "node1"
```

```
chefdk# knife bootstrap 172.28.128.3 -x root -P root  
-N "node2"
```

knife bootstrap

```
knife bootstrap HOSTNAME -x root -P PASSWORD -N module2
```

```
chefdk# knife node list  
chefnode# cd /etc/chef/  
chefnode: /etc/chef# chef-client  
chefnode: /etc/chef# vi client.rb  
add the following line  
  log_level :info  
chefnode:/etc/chef# ohai  
chefnode:/etc/chef# ohai | grep  
'platform'
```
